Manager of Company Announcements ASX Limited Level 8 Exchange Plaza 2 The Esplanade PERTH WA 6000

Via E-Lodgement

QUARTERLY REPORTS FOR THE PERIOD ENDING 31 MARCH 2015

Issued Capital: 332M	ASX Code: RMP	Closing price: A\$0.042
	AIM Code: RMP	Closing Price: £0.024

The Board of Red Emperor Resources NL ("**Red Emperor**" or the "**Company**") is pleased to provide the following commentary and Appendix 5B for the period ending 31 March 2015.

Philippines (SC55)

On 2 March 2015 Red Emperor signed a Farmin Agreement with Otto Energy Philippines Inc. (a wholly owned subsidiary of Otto Energy Ltd (ASX: OEL **"Otto"**) to farm in to the highly prospective offshore Philippines Block, Service Contract 55 (**"SC55"**).

SC55 is located in the southwest Palawan Basin, covers an area of 9,880km² and was awarded to Otto Energy Investments Ltd (formerly NorAsian Energy Ltd) in 2005. It is a deep-water block in the middle of a proven regional oil and gas fairway that extends from the productive offshore Borneo region in the southwest to the offshore Philippine production assets northwest of Palawan.

SC55 contains a number of distinct exploration play types including the Hawkeye turbidite clastic prospect and the material Cinco carbonate gas/condensate prospect, as well as a number of follow-up leads. The permit provides a material opportunity and a series of possible drill targets in an exploration campaign that will be undertaken during the remaining term of the service contract.

The Hawkeye prospect was identified on 2D seismic originally acquired by Otto in 2007 and further defined with the 600km² 3D seismic acquisition in late 2009. Hawkeye contains a 'Best Estimate' STOIIP of ~480 MMbbls of oil and a 'Best Estimate' Gross Prospective Resource of 112 MMbbls (RMP net 14.3 MMbbls) of oil according to the Operator, Otto Energy.

The Cinco gas/carbonate prospect was identified as part of a 1,800km² 3D seismic program undertaken by BHPB in 2010 that focused on a trend of carbonate prospects and leads, with Cinco being analogous to the Malampaya producing gas/condensate field in the Philippines. Cinco contains a 'Best Estimate' GIIP of 2.4 Tcf with a 'Best Estimate' Gross Prospective Resource of 1.6 Tcf of gas and 57 MMbbls of associated condensate (RMP net 208 Bcf) and 7.3 MMbbls). The Net Prospective Resources exclude Government Share of profit oil.

Hawkeye Prospect

The Hawkeye prospect is interpreted to be a large, relatively undeformed Miocene aged toe thrust, analogous to offset discoveries in Malaysia. The Miocene turbidite reservoir is likely to be tested by a well sitting in approximately 1,690m of water. The prospect was first identified on 2D seismic data, which was later followed up by a 3D seismic acquisition in early 2010. The 3D data has further matured the prospect to drillable status. Hawkeye is a well imaged, toe thrust structure of more than 500m vertical relief, 50km² area with attendant Direct Hydrocarbon Indicators. Multiple flat spots are evident with an associated oil column consistent with detailed rock property analysis.

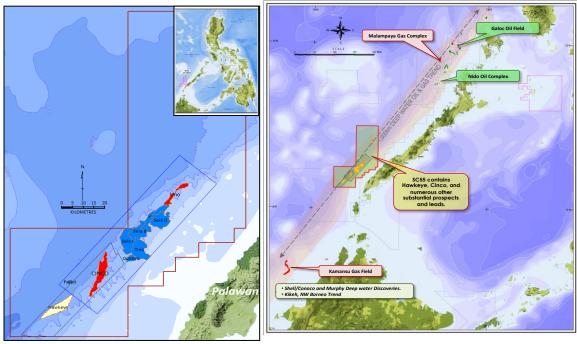

(MMbbls)	STOIIP	Gross Recoverable	Net RMP
Low Estimate	87	19	2.4
Best Estimate	484	112	14.3
High Estimate	1,539	401	51.1

The Operator's estimate of the Hawkeye Prospective Resources is shown below:

*Source: Otto Energy

The Operator, Otto Energy, is anticipating a spud date in early Q3 2015 for the Hawkeye-1 well. The exploration well has been designed to reach the top of target reservoir approximately 1,000m below the sea bed floor and intersect the gas oil contact to prove or otherwise the presence of the oil leg.

Otto has entered into a Letter of Intent with Maersk to secure the Maersk Venturer ultra-deepwater drillship to drill the Hawkeye-1 exploration well. As one of the most modern and advanced drillships in the world, this rig has the required capability to drill the Hawkeye-1 exploration well. All required long lead items have now been procured and stored in yards in Labuan, Malaysia. Drilling of the Hawkeye-1 exploration well is expected to commence in early Q3 2015.

Please refer to ASX Announcement on 2 March 2015 for more details on the transaction.

Puntland

The Company's Joint Venture (JV) continues to significantly reduce its presence in Bosaso, Puntland and will refrain from any operational activity and associated expenditures pending a resolution of the political situation between the Regional Government of Puntland and the Federal Government of Somalia regarding the legitimacy of oil concession contracts.

Given the considerable efforts taken by the JV to date in Puntland (Somalia), the JV has requested a two year extension to the current exploration period from the Government of Puntland to allow time for these political challenges to be resolved.

Red Emperor is optimistic that agreements can be reached to enable the JV to remain in control of its two PSCs that provide both exposure and leverage to potentially multiple billion barrels of oil.

Georgia

Despite Red Emperor again being advised during the quarter by the operator, Strait Oil & Gas ("Strait"), that an agreed drilling program and a valid drilling licence was in place with the Georgian Oil and Gas Ministry, drilling activity did not commence in Block VIb. Whilst a drill rig and all required services remain available, Strait's major shareholder, Range Resources Limited ("Range"), who are obligated to fund the drilling program and the costs to the end of Phase III of the Production Sharing Contract ("PSC") on behalf of the Joint Venture, has been focused on the disposal of the asset as opposed to continued further investment.

Red Emperor understands that representatives of Strait will be negotiating to extend the PSC that covers Block VIb, which was due to expire in March 2015, however there is no certainty that such an outcome can or will be achieved. While Red Emperor is hopeful that it will, in the meantime the Company continues to stand by its position with respect to Range's obligations to drill a second well and cover the costs of Phase III on Block VIb, which formed part of the "drilling program" contemplated in its 2011 Subscription Agreement (the "Agreement"). Red Emperor has met its financial commitment with respect to the Agreement and is disappointed that drilling activity is yet to commence. The company will continue to protect its interests with respect to both blocks and the value they represent.

Corporate

During the quarter the Company placed 66,558,555 shares at A\$0.032 per share (£0.016) to raise approximately A\$2.13m (£1.06m) from sophisticated investors both in Australia and the UK. The funds raised from the placement will be used for purposes associated with the Company's share of upcoming drilling costs in the Philippines.

Red Emperor sold its direct equity investment in Highfield Resources Limited (ASX: HFR) during the quarter in accordance with its treasury management strategy. The shares were sold at price of 80c per share, which netted the Company A\$798,279 after brokerage, a 66% return on its A\$480,000 investment.

For and on behalf of the Board

Notes

- ¹ The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 Accounting Standards ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
