ASX Announcement

**Quarterly Activities Review
For the period ending 31 March 2010**

EXPLORATION UPDATE

JILLEWARRA PROJECT

The North Murchison Goldfields have recently had resurgence in polymetallic exploration with the discoveries of the Doolgunna Project (Sandfire Resources NL) and the Austin Project (Silver Swan Group).

The Company is planning a drilling program within the next quarter after interpretation of prior exploration activities including geochemistry and soil sampling has identified drill targets to test the gossan and the margins of the ultramafic unit. The prospective ultramafic – basalt contact zone strikes for over 6km within the Project Area and has received limited historical drill testing.

The Company continues to pursue heritage and environmental approvals for such programs.

RUSSIAN TIMBER PROJECT

As announced to ASX on 19 June 2008, the Company has entered into a Memorandum of Understanding with Russian partners whereby the partners will provide the Company with the opportunity to acquire a 100% interest in a license to harvest a timber resource in Russia.

The Company continues to monitor the progress of the acquisition and looks forward to updating the market on the project in the future.

PROPOSED SIBERIAN POTASH PROJECT ACQUISITION

The Company remains confident of acquiring the project under the commercial terms as detailed in previous announcements and firmly believes in the outlook for the future of the potash and fertiliser industries as recently supported by several major acquisitions within the industry.

OTHER PROJECTS WITH RUSSIAN PARTNERS

The Company and its Russian Partners continue to source and review additional and alternative resource projects, including mineral resources, for attractive opportunities to add shareholder value. The Company is currently reviewing several prospective projects. The Company looks forward to updating the market on these exploration projects in the future.
